EDUCATION

INSEAD

Fontainebleau, France
2026

MBA, Class of December 2026

- Awarded INSEAD Diversity Fund Scholarship; active member and contributor in PE & VC, TMT and Football clubs
- Relevant coursework: Corporate Strategy, Managerial Accounting, Financial Analysis, Corporate Finance Policy, Investment and Asset Management, Negotiations, Corporate Finance

RWTH Aachen

Aachen, Germany
2018 - 2021

M.Sc. in Robotic Systems Engineering

- Engaged in the INTAC mentorship program and organized a football tournament to foster cross-cultural connections, while advancing expertise in Robotics, AI, Machine Learning, and Augmented & Virtual Reality
- Master thesis investigated commercial viability of AR in industrial workflows, providing a framework later adopted by the R&D team

B.V.B College of Engineering and Technology, KLE University

Hubli, India

B.E. in Robotics and Automation

2013 - 2017

- Organized cultural and technical events in department; participated in and won a team prize through the Automotive Club
- Graduated with an 8.89/10 CGPA (3.56/4 US grading system), top 5 in class

EXPERIENCE

Infosys Ltd

Düsseldorf, Germany

An Indian multinational technology company with \$20B in revenue that offers information technology, business consulting, and outsourcing services.

Financial Services GTM Strategist & AI Evangelist

2026

- Led market intelligence and GTM strategy for Infosys's Financial Services across Luxembourg's €8.3T wealth management sector, scoring and prioritising 13 target firms
- Built and deployed a full-stack sales intelligence dashboard (React/TypeScript with Infosys Topaz Fabric) using an agentic Claude workflow, delivering 10+ interactive demos that replaced static pitch decks for client presentations and onboarding

Reiser Simulation and Trainings GmbH

Berg, Germany

Leading manufacturer of flight simulators in Germany.

Product Owner - XR Integrator

2025

- Identified a gap in the defence maintenance training market and led end-to-end development of a VR helicopter maintenance trainer from concept to client demo; delivered an estimated 75% cost reduction versus physical trainer (~600K savings on an ~800K asset)
- Conducted competitive analysis of 10+ XR hardware providers for the CTO, evaluating cost-per-wear, integration complexity and client charge-out potential; findings directly shaped technology selection across 2 system upgrades
- Applied rapid self-learning, technical problem-solving, and systems thinking to create 15+ reusable VR template projects and development documentation adopted as the internal standard
- Led a core team of 4 within a cross-functional Agile organisation of 25 developers across 10+ nationalities to deliver certified simulation experiences for international aviation and defence clients

LUCE Stiftung

Nuremberg, Germany

A company collaborating with local government, universities, and businesses on diverse training and education initiatives.

Product Owner - Software Developer

2022 - 2024

- Co-led product vision and end-to-end development of LUMIS Campus, an award-winning immersive e-learning platform serving 50,000+ students; translated client requirements into a prioritised product roadmap across a 3-year project lifecycle
- Delivered AR remote maintenance application for BHS Corrugated enabling real-time expert-guided field support; product showcased to 100+ prospective clients at industry exhibitions, generating concrete commercial interest
- Designed and executed structured user research with 100+ participants across ages 14 to 60, synthesising findings into prioritised UX improvements that shaped the platform interface and learning architecture
- Turned around a failing VR deployment in 48 hours by designing a superior user experience, demonstrating rapid problem-solving and high-stakes execution
- Designed and delivered a 2-week VR training curriculum in German, coordinating with pedagogic experts and creating structured materials that earned top evaluations from students and professionals
- Led a 3-person AR/VR team, introducing structured workflows, clarifying roles, and driving operational improvements that halved onboarding time and increased delivery reliability

Siemens AG

Nuremberg, Germany

German MNC technology group specializing in industrial automation, building systems, rail transport, and healthcare solutions.

Intern and Master Thesis Student

2021

- Created end-to-end workflow documentation for AR development, decreasing onboarding time for future interns by 45 days; collaborated with R&D team to demonstrate a use-case for AR in industrial automation, gaining leadership endorsement

ADDITIONAL INFORMATION

Nationality/Work Authorisation(s): German Passport holder, EU work authorisation

Languages: English (Native), German (Business), Marathi (Native), Hindi (Fluent), Kannada (Fluent)

Investing: 87% gain on personal portfolio since 2023, applying bottom-up fundamental analysis to emerging tech companies

Certificates: Finance Foundations, Financial Modelling and Forecasting Financial Statements, Project Management (PMI)

Technical Competencies: Agentic AI, Claude Code, prompt engineering, MS Office, personal AI assistant: [AIPA](#)

Interests: watching and analysing my club: Chelsea FC, backpacking across Algarve, watching movies: Memento, cooking & baking: banana walnut bread
